RE: Announcement of Effort to Create Treasure Island Bicycle/Pedestrian Plan

Dear XXX,

We are pleased to announce that the City & County of San Francisco is embarking on an exciting and ambitious community-based effort to make Treasure Island a top-tier walking and bicycling environment. This is part of the City’s priority to implement the best environmental and healthy transportation practices in this dynamically changing neighborhood.

The San Francisco Department of Public Health (DPH) has received a Community-Based Planning grant from the State Department of Transportation (Caltrans) in order to create a Bike & Pedestrian Plan for Treasure Island through an extensive community outreach process. During the next two years, we will partner with the nonprofit San Francisco Bicycle Coalition (SFBC) in this endeavor.

We also look forward to working with you and your organization to ensure that this Plan helps to make San Francisco’s newest neighborhood-in-the-works a model community for bicycling and walking for both residents and visitors.

We hope that you will bring your ideas and energy to this community planning process. We will be in touch with you again within a few months to let you know the next steps in the project. In the meantime, please feel free to contact us with any questions or initial ideas. Thank you in advance for your support, and we look forward to working with you.

Sincerely,

Cynthia Comerford Scully
